About Me

Motivated and aspiring Java Backend developer with hands-on experience in building websites using HTML, CSS, and JS and building applications using JAVA technology. Curious to learn about emerging web technologies. Looking forward to making a significant contribution to an organization through dedicated effort.

Projects

CabWay (Online Cab Booking Management System)

- Using this web service a customer can book a trip, an admin can assign a driver to a particular trip, and a driver can complete the trip.
